The Lafayette Police Department participates in the national prescription take back events each year, which focuses on removing potentially dangerous controlled substances from our nation's medicine cabinets. A national take back day provides a unified opportunity for the public to surrender expired, unwanted or unused pharmaceutical controlled substances and other medications to law enforcement officers for destruction. This event is an effort to bring national focus to the issue of pharmaceutical controlled substance abuse.

Items which cannot be accepted for take back programs are needles, mercury thermometers, oxygen containers, chemotherapy or radioactive substances, pressurized canisters and illicit drugs.
