October 2013

Theme of the Month: Autumn Harvest

This month we will learn about the season by using nature in our art and sensory experiences. We will also uncover the science of the seasons.

Why Play?

There is a growing body of research that shows a link between play and the development of cognitive and social skills that are prerequisites for learning more complex concepts as children get older. For example, play is linked to growth in memory, self-regulation, oral language, and recognizing symbols. It has been linked to higher levels of school adjustment and increased social development. Play has also been linked to increased literacy skills and other areas of academic learning (a view held by Piagetian and Vygotskian theories of child development)

Show and Tell

This month we will take a break from the alphabet to explore our imagination.

October 4th- Happy Hats (Wear any hat or wig.)

October 11th Pajama Party (Wear comfortable pajamas and bring a stuffed animal or blanket.)

October 18th- Silly Socks (Wear any socks you want even if they don't match!)

October 25th- Color Clash (Wear as many different colors as you can.)

October 31st- Anything Goes (You can wear anything you want to school as long as it's comfortable to play in and is not scary.) This will be held on Thursday.

Things to Remember:

*Free Vision Screenings October 2nd and 3rd conducted by Colorado Lions KidSight Program using the latest in vision technology. Flyers and permission slips to follow.

*Scholastic Book Orders will be sent out this month. Please use school code LF7GF

*No school October 14th

*Please send children to school with a labeled water bottle and healthy snack.

Healthy Kids Corner

Quit the "clean-plate club." Let kids stop eating when they feel they've had enough. Lots of parents grew up under the clean-plate rule, but that approach doesn't help kids listen to their own bodies when they feel full. When kids notice and respond to feelings of fullness, they're less likely to overeat. -KidsHealth
